The Role of Liver Societies in the Global Viral Hepatitis Response

Anna S. Lok, MD
Alice Lohrman Andrews Research Professor in Hepatology
Director of Clinical Hepatology
Assistant Dean for Clinical Research
University of Michigan, Ann Arbor, MI, USA
2017 President, American Association for the Study of Liver Diseases (AASLD)
Role of Liver Societies in the Global Viral Hepatitis Response

• AASLD, along with other Liver Societies, can play an important role in promoting WHO goals globally
  • Advocate for funding – NGOs, industry
  • Provide consultation to WHO, local government – develop policies
  • Collaborate with local government, medical societies, communities – implement policies
  • Train physicians and other healthcare providers – empower, capacity building, provide quality care
  • Conduct research – HBV cure, HCV vaccine, local data, implementation science, comparative effectiveness
Please join us tomorrow Nov 2 (Thu) at 8.00 AM in Matisse
Joint session of 4 regional liver societies
“Liver Societies’ Role Towards Viral Hepatitis Elimination”
Nov 2 Regional Liver Society Meeting Agenda

• **Prevention - Mother to child transmission of HBV**
  • Strategies to increase HBV vaccine coverage (in particular birth dose coverage)
  • Communicate with OB providers on need for antiviral therapy in highly viremic HBsAg+ mothers

• **Improve diagnosis**
  • Raise awareness – Education, public campaign
  • Decrease stigma – Education, public policies
  • Facilitate screening of high risk populations – Integrate into routine care

• **Improve linkage to care**
  • Reach out to vulnerable populations and persons living in rural areas
  • Address language and cultural barriers
  • Decrease / remove financial barriers
  • Educate on consequences of chronic HBV/HCV and benefits of treatment

• **Improve access to antiviral treatment**
  • Decrease costs of medications and provide safety net
  • Increase trained providers/treaters
AASLD is a global society

- 45% of 10,000 The Liver Meeting® participants from outside N America
- 23% of 5500 AASLD members are international

Our mission – To advance and disseminate the science and practice of hepatology, and to promote liver health and quality patient care
Reaching the WHO 2030 Goals in the USA

• AASLD will play a pivotal role in implementing the National Academies of Sciences, Engineering and Medicines Roadmap to meet the WHO goals for Viral Hepatitis Elimination in the USA
  • AASLD will collaborate with CDC, Health and Human Services, professional and patient societies to coordinate achieving these goals
  • Key roles of AASLD will include:
    • Advocacy
    • Education
    • Capacity Building
    • Research
AASLD Advocacy Efforts

Annual Liver Capitol Hill Day
• Meet with US Senate and Congress
• Advocate for funding to support
  • National Institutes of Health (NIH) – research
  • Centers for Disease Control and Prevention (CDC) – prevention, screening, data collection and analysis....
  • Increase access to medications – cost control

National Academies Report - A National Strategy for the Elimination of Hepatitis B and C
• Phase 1 – Elimination of HBV and HCV is Feasible
• Phase 2 – Recommendations on implementation
AASLD Education Materials

- AASLD and other Liver Societies have a large portfolio of educational materials that can be used as is or adapted to the needs in countries and regions. AASLD educational materials include
  - **Fundamentals of Liver Disease** for primary care providers: slides + video
    - HBV, HCV, Abnormal liver tests, Cirrhosis, NAFLD/NASH
  - **LiverLearning®** – videos or slides from various meetings, webinars, and more.
  - **Evidenced-based Practice Guidelines**
    - HBV – 2015, additional update in 2018
    - HCV guidance online – updated 3-4 times each year, more than 1 M users since 2014
    - HCC – 2017, additional update in 2018
  - **Journals**
    - Hepatology, Liver Transplantation – discounted subscriptions to low income countries
    - Hepatology Communications – open access
    - **Clinical Liver Disease** - short review articles, text, videos, and slides

*Online, free to all, access via [www.aasld.org](http://www.aasld.org), selected education materials translated into Spanish # Free to AASLD members or accessible to non-members with a paid subscription. The Liver Meeting® attendees receive free access to The Liver Meeting® content for 1 year.

# Free to AASLD members or accessible to non-members with a paid subscription. The Liver Meeting® attendees receive free access to The Liver Meeting® content for 1 year. Trainee membership USD 25/year, Associate membership USD 135/year
AASLD Capacity Building

• Training
  • Funding for training of hepatology fellows, physician assistants and nurse practitioners – salary support for ~12/year

• Career development
  • Career development workshop at The Liver Meeting®
  • Academic skills workshop with AGA, Masterclass with EASL

• Mentoring
  • Fellow of AASLD to Trainees and Early Career Hepatologists, open to international members, virtual meetings

• Attracting new blood to the field
  • Emerging liver scholars program for residents to attend The Liver Meeting®
  • Ambassadors program for residents to reach out to students
Education and Capacity Building – AASLD’s Global Efforts

• Young investigators’ research methodology workshops
  • Didactic and interactive sessions at regional meetings
  • Sponsor faculty and provide travel awards to young investigators
  • APASL (Asia Pacific) since 2004
  • ALEH (Latin America) since 2016
  • AMH (Mexico) since 2017

• Endorsement/Joint Programming at other countries’ national meetings
  • China, India, Turkey, Greece, Saudi Arabia, Canada….

• Travel awards for young investigators to attend The Liver Meeting® 2017
  • 114 awards, 6 dedicated to those from low or middle income countries
Liver Societies can help develop Care and Treatment Programs

• Help governments to develop training programs/curriculum to diagnose and treat chronic HBV and HCV and their sequelae: cirrhosis and HCC, tailored to local needs and resources

• Develop model clinics to treat chronic HBV and HCV in accordance with WHO and Regional Guidelines, integrate cirrhosis care and HCC surveillance into chronic hepatitis management

• Advise local governments and medical communities to conduct research to assess disease burden, epidemiology, and effectiveness of screening and treatment programs

• Lobby NGO, industry and local governments for financial, IT, and logistical support
Research – Additional Tools Needed to Achieve Complete Elimination of HBV and HCV

Research needs
- Cure for HBV
- Vaccine to prevent HCV
- Implementation models – for effective prevention, screening, linkage to care, and treatment in different settings with varying resources

AASLD’s roles
- Advocate for research funding
- Disseminate research findings
- Provide funding to support conduct of research and research training
- Provide platform for exchange of ideas, knowledge, and know how
Consultation and Collaboration To Achieve WHO 2020 and 2030 Goals of Eliminating HBV and HCV

- Liver societies will work with each other and with:
  - WHO, CDCs
  - Local governments
  - NGOs, industries
  - Regional and local medical communities, patient advocacy groups: PAHO, UNITAID, World Hepatitis Alliance....

Mission accomplished
Please join us tomorrow Nov 2 (Thu) at 8.00 AM in Matisse
